### January 2015 McBee Calf Roundup Sale Report

On January 13, 2015, McBee Cattle Company's Roundup sale of their customers' Braunvieh and Braunvieh cross calves was held at the Missouri Valley Commission Company in Boonville, Mo.

The sale was a testimony for grouping and taking full advantage of the McBee Genetic Advantage Program (MGAP). Sired by 33 different McBee bulls, five different weight groups of genetically verified steers and heifers were sorted into 10 groups to be marketed as part of the MVCC regular sale. Following a Vac-45 protocol, the calves were all weaned, bunk broke, vaccinated twice and dewormed. They were also tagged with the MCR identifying ear tag. The groups sold as follows:

450 lb steers @ \$252.50	459 lb heifers @ \$243.50
551 lb steers @ \$253.50	549 lb heifers @ \$231.00
608 lb steers @ \$244.00	623 lb heifers @ \$219.75
703 lb steers @ \$229.00	688 lb heifers @ \$210.00
807 lb steers @ \$210.25	771 lb heifers @ \$192.25

The 46th McBee Calf Roundup will be held somewhere around the second week of August, 2015
